

Hej Fenix!

Jag heter Río och jag har ett problem som jag hoppas att ni kan hjälpa mig med. Jag skriver till just er för att jag har hört att ni är bra på problemlösning.

En dag när jag tog en promenad i skogen med min hund Tiger hände en märkelig sak. Jag gick samma väg som jag alltid brukar gå. Plötsligt sprang Tiger lite före och stannade vid ett träd.

När jag kom närmare såg jag att någon stod vid trädet. Det var någon som jag inte kände igen.

- Hej sa jag.
- Vad heter du?

Men jag fick inget svar. Den jag mött lät några konstiga ljud men jag förstod inte vad hen menade.

- Du ser inte ut att bo här, var kommer du ifrån?

Frågade jag, men fick fortfarande bara märkliga ljud till svar.

Plötsligt förstod jag, vi pratade ju inte samma språk, jag förstod inte vad hen sa och hen förstod inte mig.

Så svårt det blev nu, hur ska vi göra för att förstå varandra?

Kan ni hjälpa mig?

Hur gör en för att prata med någon som en inte förstår?

Hello Fenix!

My name is Río and I have a problem that I hope you can help me with. I write to you just because I heard that you are good at problemsolving.

One day when I took a walk in the woods with my dog Tiger, a strange thing happened. I walked the same way I always used to go. Suddenly Tiger ran a little ahead and stopped at a tree.

As I walked closer I saw that someone was standing by the tree. There was someone I didn't recognize.

- Hey, I said.
- What's your name?

But I got no answer. The one I met made some weird noises, but I didn't understand what the robot ment.

- It doesn't look like you live here, where are you from? I asked, but I still got strange sounds in responde.

Suddenly I understood, we didn't speak the same language. I did not understand what the robot said and the robot did not understand me..

How difficult it was now, how should we do to understand each other?

- Can you help me?

How do you do to talkt to someone you don't understand?

After the children got to meet the characters in the movie and read the letter with us, the exciting work started to come together in a way to help Rio communicate with the robot.

The children were amazed at the robot's journey through space.

- Oh how far the robot goes.
- Space is far away.

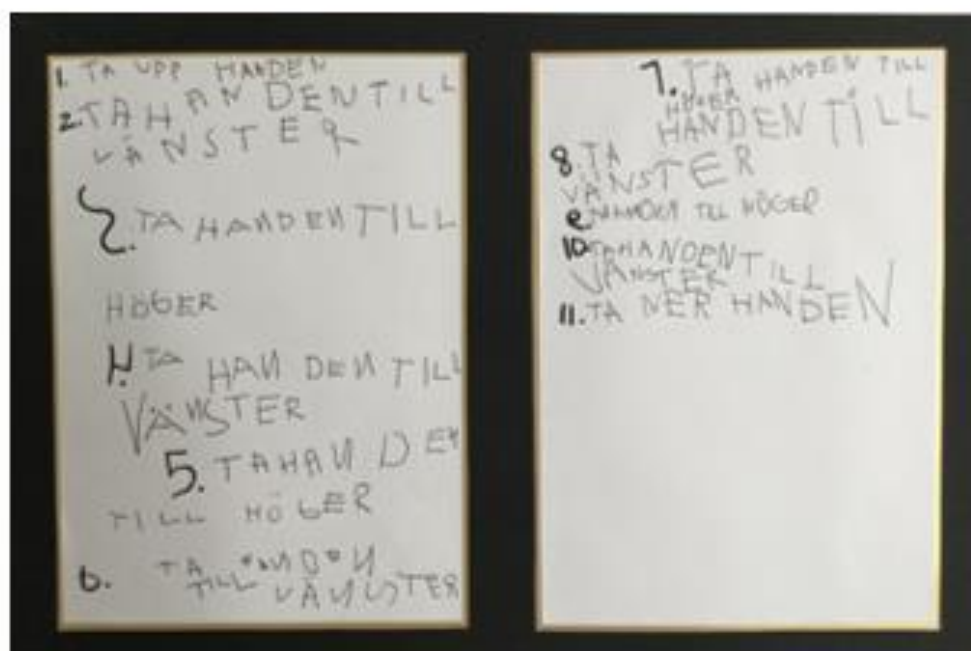

The children immediately showed great commitment and agreed that we would somehow help Rio with her problem.

At first it was a little tricky to figure out how we would do. In the children's discussions, they agreed that it is important to meet new contacts in a nice way, preferably by being friendly or welcoming.

- Maybe we can say kind words.
- You have to be kind and help.
- Say hello maybe.

Since the children were clearly having difficulty with the characters in the film can not speak the same language, some children concluded that it is also possible to talk using their body. Based on these thoughts, a programming code was then designed to say hello to someone by talking with their hands.

- Then you can talk with your hands.
- We can wave hello and see if they understand.

1. Raise your hand.
2. Take your hand to the left.
3. Take your hand to the right.
4. Take your hand to the left.
5. Take your hand to the right.
6. Take your hand to the left.
7. Take your hand to the right.
8. Take your hand to the left.
9. Take your hand to the right.
10. Take your hand to the left.
11. Take your hand down.

Please try if  
YOU can say  
hello with your  
hand!
