

## Learnathon 1

For this learnathon we chosen to work with “following instructions”.

We have since January worked with creating a music theatre. The theatre has engaged the whole preschool, and it is about the different projects that the children have shown interest in during the year. The story takes place in the Universe. There is a planet where the co-make characters live, which we have introduced with a short movie. We made the movie with the app Puppet Pals.

In the story the Robot has a message for the superheroes. The robot prints out different symbols, and the symbols show SHADOW, SLIME, PLANET. What it wants to say is that the superheroes need to go to the Shadow-slime planet.

We have tried to make shadow slime with the children, and one recipe we tried is this one.

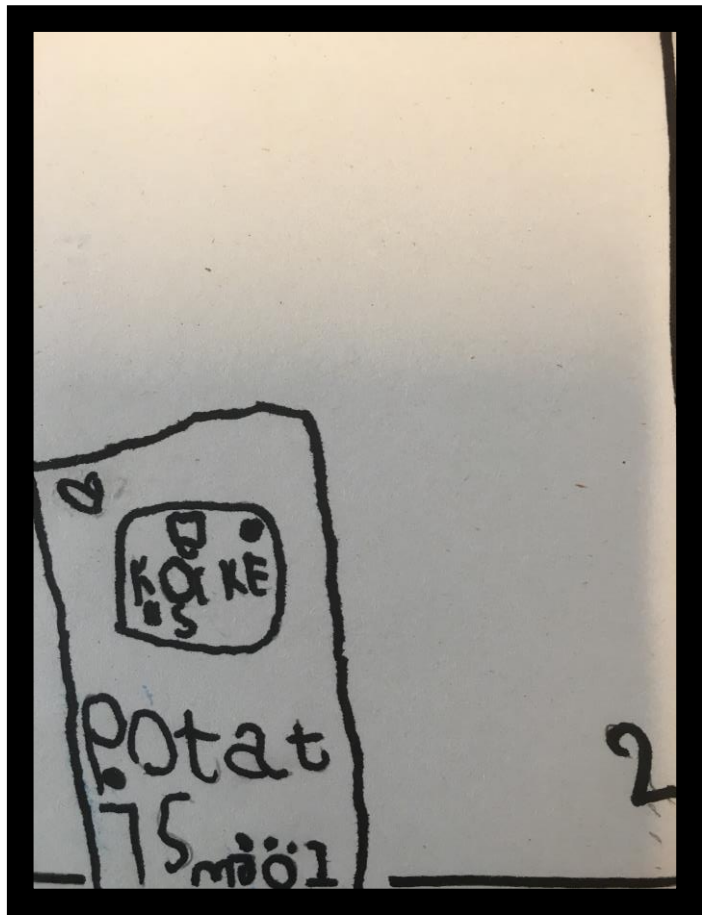

Please, follow the instruction cards our children made for you.
